corpuls **disposables**

OUR DISPOSABLE PRODUCTS – HYGIENIC HANDLING AND HIGH COMFORT

corpuls disposable products are arguably the most hygienic way to use **corpuls** devices. In contrast to reusable products, they are individually packed and 100% germ and residue free. Therefore, cross-contamination is ruled out even without the use of expensive disinfectants or lengthy reprocessing procedures.

The costly use of reusable materials is eliminated by **corpuls** disposable products. Efficiency and the cost-benefit factor increase.

BLOOD PRESSURE CUFFS

Our blood pressure cuffs are available as short-term and disposable cuffs. They are 100% latex-free and offer a high comfort level due to the soft material and rounded edges.

Short-term Blood Pressure Cuffs

- Use for up to **7 days**
- **Patient ID:** Labelling field for patient assignment and expiry time after opening
- **Colour coding** for the different sizes

Disposable Blood Pressure Cuffs for Children and Newborns

- **5 different sizes** for a perfect fit
- Colour coding for the different sizes

TEMPERATURE SENSORS

A number of diseases can be characterized by certain changes in body temperature. In some cases, the course of the disease can also be tracked by measuring body temperature. We offer different temperature sensors for easy control of the inner ear or skin surface temperature. A big advantage of these sensors is the continuous measurement of body temperature as opposed to infrared-based technology.

Tympanic Membrane Temperature Probe

- **Optimal adaptation** to the ear canal using expansion foam
- **Very good measurement** results due to a perfect fit
- **Measuring accuracy** in the temperature range from 5°C to 45°C at $\pm 0.2^\circ\text{C}$
- Available for **adults and children**

Skin Temperature Probe

- **Hypoallergenic** adhesive for better skin tolerance
- Suitable for **adults and children**

SPO₂-SENSORS

The use of disposable SpO₂ sensors not only helps to avoid cross infections, but also saves on preparation time. Our MASIMO sensors offer high wearer comfort due to the thin, soft material and the self-adhesive contact surface reduces technical alarms.

- **Up to 168 hours** of active patient monitoring – This corresponds to a full 7 days with 24-hour monitoring.
- **Disposable adhesive sensors** are also available for the MASIMO Rainbow Module

- For more information, see our product catalogue or contact your sales partner.
An adapter is required to use individual disposable products.
